

Communication

Date	1 July 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Google Meet	Team members	Discuss daily tasks and project progress.
2	Progress Update	Weekly	Google Meet	Team members	Review completed work and plan upcoming activities.
3	Issue / Bug Discussion	As Needed	Google Meet/VS Code	Team members	Resolve coding issues, bugs, and technical challenges.
4	Stakeholder Review	Bi-Weekly	Google Meet	Team members	Collect feedback and review project milestones.
5	Final Demo Rehearsal	Once	Google Meet	Team members	Verify application functionality and prepare for final presentation.
6	Final Project Submission	Once	GitHub	Team members	Submit the final project report, source code, and documentation.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Selecting the most suitable machine learning model for flood prediction.	Trained and evaluated Decision Tree, Random Forest, KNN, and XGBoost models. Selected the best-performing model based on the F1-score and evaluation metrics.
2	Integrating the trained model with the Flask web application.	Used Joblib to load the saved model (<code>best_model.pkl</code>) and scaler (<code>scaler.pkl</code>) for real-time predictions.
3	Handling data preprocessing and maintaining consistent feature scaling during prediction.	Applied StandardScaler during training and reused the saved scaler during inference to ensure consistent predictions.
4	Debugging runtime errors and validating user inputs.	Implemented input validation, tested the application with different datasets and weather conditions, and resolved runtime issues through iterative debugging.
5	Managing project files and version control among team members.	Used Git and GitHub for version control, collaboration, and maintaining the project history.
