

Project Demo Planning

Date	1 July 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, objectives, problem statement, and technology stack.	1:00min	Guravaiah Katta
2	System Architecture & Workflow	Explain the system architecture and project workflow.	0:40min	Guravaiah Katta
3	Live Application Demonstration	Demonstrate the deployed application and flood prediction process.	1:20min	Guravaiah Katta
4	Project Code Walkthrough	Explain the project structure, machine learning model, and Flask application.	2:40 min	Guravaiah Katta
6	Conclusion	Summarize the project, deployment, and key outcomes.	1:09 min	Guravaiah Katta

Demo Flow Summary:

Step	Activity	Notes
1	Project Introduction	Introduce the project title, objectives, problem statement, and technology stack.
2	Architecture & Workflow	Explain the three-layer architecture and overall system workflow.
3	Application Demonstration	Demonstrate the deployed web application, enter weather parameters, generate flood predictions, and display the model performance page.
4	Code Walkthrough	Explain the project folder structure, dataset generation, machine learning model training, evaluation metrics, Flask backend, and HTML templates.
5	Project Conclusion	Summarize the project, explain the deployment on Render, and conclude the demonstration.
