

Project Initialization and Planning Phase

Date	24 June 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
A resident living in a flood-prone area.	Receive timely and accurate flood predictions so that I can protect my family, home, and belongings before flooding occurs.	I often do not receive reliable flood warnings early enough to take preventive action.	Existing forecasting methods may not effectively analyze changing weather conditions and rainfall data in real time.	Anxious, vulnerable, and unprepared during heavy rainfall and possible flood situations.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A disaster management officer responsible for ensuring public safety during floods.	Identify flood-prone regions early and organize emergency response measures efficiently.	Analyzing large amounts of weather and rainfall data manually is time-consuming and prone to delays.	Flood prediction depends on multiple environmental factors that change continuously and require intelligent analysis.	Concerned about making timely decisions that can protect lives and reduce property damage.
PS-2	A farmer whose crops and farmland are vulnerable to flooding.	Receive early flood predictions to protect my crops and livestock.	I do not have access to timely and accurate flood prediction information specific to my area.	Weather conditions change rapidly, making floods difficult to predict.	Worried about crop damage, financial losses, and the impact on my livelihood.
